PROFILE SUMMARY

Full-Stack Developer with **internship experience** building **scalable and production-ready web applications**. Proficient in **Node.js, Express.js, database management, authentication, and performance optimization**. Collaborative **team player** experienced in **agile environments**.

PROJECTS

Portfolio [[live link](#)]

Sourcebae Clone [[live](#) / [GithubLink](#)]

- Developed a responsive web application using React and Vite with reusable components and clean frontend architecture.
- Designed a fast, user-friendly interface with responsive layouts for different screen sizes.

Context-e-commerce Clone [[live](#) / [GithubLink](#)]

- Built a responsive e-commerce application using React and Context API for global state management.
- Implemented product browsing, cart management, and checkout functionality with reusable components.

Cadbury Chocolate — Cadbury UK Clone [[live](#) / [GithubLink](#)]

- Developed a responsive e-commerce clone using React with a modern product catalog and interactive UI.
- Created reusable components and user-friendly navigation inspired by the Cadbury UK website.

Barsana Rice Clone [[live](#) / [GithubLink](#)]

- Developed a responsive product website using HTML5, CSS3, and JavaScript.
- Designed interactive sections and deployed the website using Vercel with source code managed on GitHub.

DAVV Document Management System (DMS) Clone [[GithubLink](#)]

- Developed a desktop-based Document Management System using Electron.js, React.js, Node.js, Express.js, and MySQL.
- Implemented document upload, search, record management, PDF preview, REST APIs, and Windows application packaging.

Bank Transaction Backend Clone [[GithubLink](#)]

- Developed a secure banking backend using Node.js, Express.js, MongoDB, JWT, and Bcrypt.
- Built REST APIs for authentication, account management, balance retrieval, and fund transfers with validation and protected routes.

EXPERIENCE

Sheryiansh Private Limited (Bhopal, India)

Full Stack Developer Training Completed hands-on training in Full Stack Development with a focus on React.js, REST APIs, and frontend-backend integration. Integrated the Group Creation API into the frontend using React.js and Axios. Consumed REST APIs, handled API responses, validation, and error states. Collaborated on API integration and test
